
AWARD OF MAJOR BUILDING CONTRACT

Tuesday 18 April 2017

Tianqi Lithium Australia is pleased to announce that MSP Engineering Pty Ltd (MSPE) has awarded a key contract to Georgiou Group for the design and construction of Non-Process Infrastructure for the Lithium Hydroxide Processing Plant (LHPP) Project, which is currently under construction in Kwinana, Western Australia.

The Non-Process Infrastructure is an essential part of the project and includes an administration building that will serve as Tianqi's Australian headquarters, along with a state-of-the-art control centre, which will be core to the operation of the facility, plus laboratory, training centre and workshop facilities.

The award of the contract to the Georgiou Group demonstrates TLA's and MSPE's commitment to working with local contractors and suppliers and supporting WA's labour and manufacturing industry.
